Serial No.: 10/708,068 Art Unit: 3617 Examiner: KWON, John Page 2 of 4

IN THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

1. - 17. (Canceled)

18. (Original) An outboard motor comprising:

an internal combustion engine; and

a multi-mode set of fault indicators mounted directly to a portion of the internal combustion engine, wherein the set of indicators provides at least one form of feedback to a user regarding at least one of an operational condition at start-up and an operational condition during running.

- 19. (Original) The outboard motor of claim 18 wherein the at least one form of feedback includes a visual feedback.
- 20. The outboard motor of claim 19 wherein the set of indicators is (Original) configured to illuminate at engine start-up if no engine fault conditions are deemed present and at least partially illuminate during engine running if a fault condition is deemed present.
- 21. (Original) The outboard motor of claim 20 wherein the set of indicators includes a separate indicator to indicate each of the following at engine start-up:

kill switch activation:

sensed crankshaft position;

acceptable charging level attained; and

acceptable drive gear position.

- 22. The outboard motor of claim 21 wherein one indicator Is (Original) configured to change condition if the drive gear position is in neutral at start-up.
- 23. The outboard motor of claim 20 wherein the set of indicators (Original) includes a separate indicator to indicate each of the following during engine running:

514-732-7065 >> 917038729306

charging system malfunction; injection/ignition system malfunction; sensor system malfunction; and engine lubrication/engine temperature malfunction.

- 24. (Original) The outboard motor of claim 19 further comprising a control unit mounted to the internal combustion engine and wherein the multi-mode set of fault indicators is mounted to the control unit in a manner visible to a user when only a top cover of the outboard motor is removed.
- 25. (Original) The outboard motor of claim 24 wherein the control unit includes a recordable medium accessible by a service technician and configured to maintain a history of any fault indicator.
- 26. (Original) The outboard motor of claim 19 wherein the internal combustion engine is a two-stroke internal combustion engine.
- 27. (Original) The outboard motor of claim 19 further comprising a battery to supply a voltage to a plurality of electronic components.
- 28. (Original) The outboard motor of claim 19 wherein the Internal combustion engine is a rope-start engine.
- 29. 36. (Canceled)
